LEADERSHIP

LEVEL0 Founder & First President

Founded a student game-development club in August 2025. Led recruitment, role allocation and team matching across programming, art and game design.

Organized the club's first game jam in May 2026. All six teams published browser-playable games. Set up a public exhibition, external judging and student voting.

BUILD & ITERATE

Job Battle

Prototype in progress

Unity / C# / Photon | Claude Code + Unity MCP

Directed the rules and art for a four-player territory-control prototype. Iterated with Claude Code and Unity MCP, inspecting scenes, prefabs, console logs and play state.

Traced a broken Animator reference to asset recreation in setup code. Preserved the controller reference and verified Idle playback and entry into the Attack state.

03 Projects

SELECTED WORK

Lucky Derby

Solo project

JavaScript / Three.js. A 3D random racing game with camera, weather and transformation effects refined with Claude. Published on GitHub Pages.

[Play in your browser](#)

AI Mafia

Team project

Unity / Ollama / Gemma. One human plays with five AI characters. Owned rules, prompts, AI integration, UI and builds. Developed with Claude; in-game AI runs locally via Ollama and Gemma.
